Testing A Reportlab Bug

This is from our issue 544. The test will fail with a known bug on versions of reportlab earlier than 3.3.8. For the tests to pass, the two very similar tables below should be displayed similarly.

Software Notes

Software	Version	Notes
Ubuntu	15.04 (Vivid Vervet) or 15.10 (Wily Werewolf)	Full-on systemd support. Investigate 16.04 LTS (Xenial Xerus) in April, being wary of Python versions and Snappy packages.
debootstrap	>= 1.0.77	Generate filesystems for containers.
