This Week...

KPhotoAlbum can search for videos without thumbnails on startup. Dolphin allows to remember view properties for the search mode. Screen edge bindings for scripts and scripted effects implemented in KDE Workspace. New assert methods and Get Hot New Stuff support are available for KWin scripts. Abstract calendar and printing of the highlighted part of an email in KDE-PIM. In Calligra, author information gets configurable on a settings level, floating message class added. GSoC work in cantor and bibliography database in Calligra. Bugfixes in Amarok, KDE-PIM and the KDE base packages.

Bug Fixes

Development Tools

Aleix Pol Gonzalez committed changes in [kdevelop] /cmake:

Prevent different threads to modify the KDirWatcher instance at the same time

Bug 298532: Crash at startup: CmakeManager::parse / KDirWatch::addDir (probably threading related)

Diffs: 1, 2

16 days

Revision bb7118f...

Educational

Dennis Nienhüser committed changes in [marble] /:

Handle download of map regions for themes without texture layers.

Fixes crash when opening the download region dialog when e.g. the plain map is opened. Related: Crash when attempting to download an empty set. Crash when switching to a map theme without texture layers after the download region dialog was opened at least once before.

Bug 277691: Marble crashed when attempting to download region maps

Diffs: 1, 2, 3, 4

304 days

Revision 2dae682...

Aleix Pol Gonzalez committed changes in [kalgebra] src/consolehtml.cpp:

When adding plots from the console, use the resulting expression instead of the input

This way we don't move declarations around.

Bug 292670: Kalgebra crash

Diffs: 1

100 days

Revision 96e039a...

Graphics

Alexander Potashev committed changes in [kipi-plugins] vkontakte/vkalbumdialog.cpp:

Fix crash due to infinite recursion

Guilty commit: 0e0318e5fed517f50a2d356fda88fa3ec3c7d90f "use dedicated namespace"

CCMAIL: Gilles Caulier

Synopsis

Review & Classification

The screenshot shows the ENZYME web interface. The top navigation bar includes the ENZYME logo, the word "Review", and user information "Marta Rybczynska" with buttons for "Settings", "Setup", "Help", and "Logout". A left sidebar contains a menu with items: "Insert", "Review" (highlighted), "Classify", "Digests", "Features", "Media", "Developers", "Tools", and "Users". The main content area displays a list of five commits for review, each with a commit hash, author, repository path, description, date, and status icons (checkmark and X).

Commit Hash	Author	Repository Path	Description	Date	Status
Commit <i>d585352</i> ...	Gilles Caulier (cgilles)	[digikam/development/3.0.0] /	Merge branch 'master' into 3.0.0	2012-05-30 13:26:00	✓ X
Commit <i>7616308</i> ...	Ivan Čukić (ivan)	[kactivities] lib/resourceinstance.h	Explicit constructor for ResourceInstance CC	2012-05-30 13:42:00	✓ X
Commit <i>4a4d472</i> ...	Shaheed Haque (shaheed)	[kate] playground/pate/src/kate/__init__.py	Whitespace fixes	2012-05-30 13:48:00	✓ X
Commit <i>76d6bda</i> ...	Aaron J. Seigo (aseigo)	[plasma-mobile-config] appconfig/emaildefaults	commit the fix in the correct repository Bug 283420: "Send by email" tries to start kmail	2012-05-30 13:48:00	✓ X
Commit <i>c81c901</i> ...	Aaron J. Seigo (aseigo)	[plasma-mobile-config/vivaldi] /	Merge remote branch 'origin/master' into vivaldi	2012-05-30 13:50:00	✓ X

Bug 283420: "Send by email" tries to start kmail 237 days					
c81c901...	Aaron J. Seigo (aseigo)	[plasma-mobile-config/vivaldi] /	Merge remote branch 'origin/master' into vivaldi	2012-05-30 13:50:00	✓ X

Add fullscreen mode for Kexi main window

Kexi fullscreen is implemented for Mainwindow, serving better manipulation in small factor screens (eg netbooks). Feature is accessible both using shortcuts and at launch from console.

REVIEW:105105

DIGEST:Kexi offers fullscreen mode

Transcoding for UMS collection, yay!

+ a couple of very small fixes to UmsCollection.

FEATURES:

- * Support for transcoding when copying tracks to USB Mass Storage devices; per-device transcoding preference can be saved, too.

FIXED-IN: 2.6

DIGEST: Feature: Amarok is now capable of transcoding music when copying it to USB Mass Storage devices.

Changes: Allows to replace linestrings in PNT files with polylines in SVG files.

poppler gen: don't lie ;) We can't save changes if the document has /Encrypt

Follow the coding standards

This is the start of an effort to make all of the test code of the chart shape follow the Calligra coding standards. A similar effort for the main code was finished before the start of the GSoC period.

Synopsis

KDE Commit-Digest for 13th May 2012

2012

Jun

By: [Marta Rybczynska](#)

In this week's KDE Commit-Digest:

- On startup, [KPhotoAlbum](#) can search for videos without thumbnails
- [Dolphin](#) allows remembering view properties for the search mode
- Screen edge bindings for scripts and scripted effects implemented in KDE Workspace
- New assert methods and Get Hot New Stuff support are available for KWin scripts
- Abstract calendar and printing of the highlighted part of an email in [KDE-PIM](#)
- In [Calligra](#), author information gets configurable on a settings level, floating message class added
- GSoC work in cantor and bibliography database in Calligra
- Bugfixes in [Amarok](#), KDE-PIM and the KDE base packages.
- Statistics are back...and they are impressive.
